XM radio has been the best thing that I received with my new vehicle. While traveling cross country in the past I would drop radio stations by the time that I got to Wisconsin. There was nothing to listen to until reaching central Indiana. I would be forced to listen to my CD player with music that I enjoy. With the advent of XM radio I was able to listen to what ever I wanted, where ever I wanted, when I wanted. I would give up other items on my vehicle before giving up my XM radio. There is absolutely no reason what so ever to take this away from us. If the local stations have a problem with it, its because they can't compete. That is not our fault or XM's fault.

Please keep this service alive and well.
